

Durable | Robust | Built to Last

100 Years of Marine Heritage

In the unforgiving environment at sea, there is no room for unreliable engines. This same philosophy and attention to detail stand at the heart of everything that we do.

From humble beginnings in Marseille,
From small petrol motors to technologically advanced diesel engines,
From fishing boats, to military, passenger and supply vessels,
From Europe to the USA and all around the world,
We have grown into a leading force in the engine industry,
recognised globally for our world class comprehensive range of power solutions.

1918 - 1945

In 1918, Marseille was the busiest port in France. The Baudouin family founded the company producing small 5hp engines for the fishermen and traders using the port. As demand grew, the company released their first diesel engines and started exporting to North Africa. By the end of the 1930's, Baudouin was ranked in the top three marine manufacturers worldwide.

1945 - 1970

Baudouin continued to extend the power range up to 900hp while improving reliability and durability. As a testament to their strong design, hundreds of these engines are still in global operation today. Baudouin continued the entrepreneurial spirit and launched a range of gearboxes, generator sets and complete propulsion systems, solidifying their position as one of the top marine solution providers in the world.

1970 - 1995

Throughout the next three decades, Baudouin continued to diversify, introducing a range of power generation engines. The new range of products was based on the marine design and was successfully selling into some of the world's largest Original Equipment Manufacturers. During this time, the company also stretched the power range down to 70hp and up to 1100hp.

1995 - Today

In 2008, Baudouin was acquired by Weichai Power, one of the largest diesel engine manufacturers in the world. The partnership spurred the company to enrich the product offering with over 30 new products for marine and power generation applications. Today, Baudouin continues to expand and refine their innovative power solutions to meet the ever-changing needs of their global customer base.

Vision

We aim to be globally recognised for innovative power.

Mission

We are committed to providing advanced, flexible and dependable power solutions to drive our customers' success.

Values

Commitment

We act with integrity to deliver maximum satisfaction to our customers and partners.

Responsibility

We are dedicated to delivering value to our company, our colleagues and our community.

Diversity

We promote effective communication to collaborate with our diverse team. We foster an inclusive working environment to maximize innovation, teamwork and creativity.

Global Manufacturing

With factories in Cassis, France and Weifang, China, we leverage our competencies and global manufacturing capabilities to provide the best solutions for our customers, while retaining a high level of efficiency and competitiveness. Baudouin maintains global quality standards across all factories, which is backed up by our ISO certifications in France and China.

Global Standards & Certifications

Every Baudouin product is designed and built to the highest quality and safety standards, with certifications from major marine classification societies worldwide including:

- American Bureau of Shipping (ABS)
- Bureau Veritas (BV)
- China Classification Society (CCS)
- Croatian Register of Shipping (CRS)
- Det Norske Veritas (DNV)
- Germanischer Lloyd (GL)
- Indian Register of Shipping (IRS)
- Korean Register of Shipping (KRS)
- Lloyd's Register (LR)
- Register Italiano Navale (RINA)
- Russian Maritime Register of Shipping (RMRS)
- Russian River Register (RRR)
- Turkish Lloyd (TL)

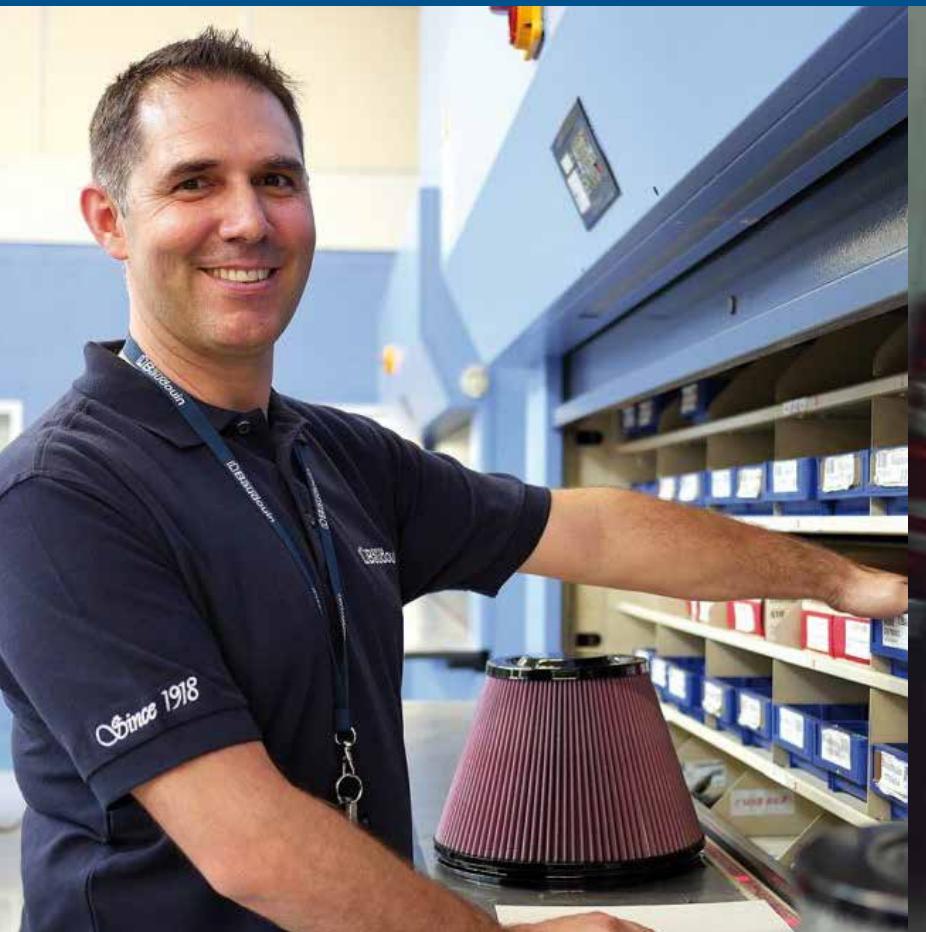

Global Service & Support

Over 200 partners worldwide delivering:

Factory-trained technicians | Genuine spare parts | Market-leading warranties

Wherever you operate

Marine Power

Whatever application they are used for, customers are assured that every Baudouin product is crafted to the same exacting standards demanded by the ocean-going environment. Our products also deliver some of the longest intervals between servicing and overhauls in the industry.

This, combined with excellent fuel economy, gives our engines one of the best and most competitive total costs of ownership. Our after-sales care and spare parts offering is available in over 130 countries worldwide - yet another reason clients trust Baudouin to stay up and running, whatever their power needs.

Marine Propulsion & Auxiliary

Propulsion & auxiliary engines from 130 – 1650 HP

Baudouin marine engines are recognised worldwide for their quality, durability and reliability. They are built specifically to meet the demands of the marine environment including design for fast and cost-effective maintenance, so you don't lose time.

Marine Generator Sets

Prime & emergency standby gensets from 85 – 1100 kVA

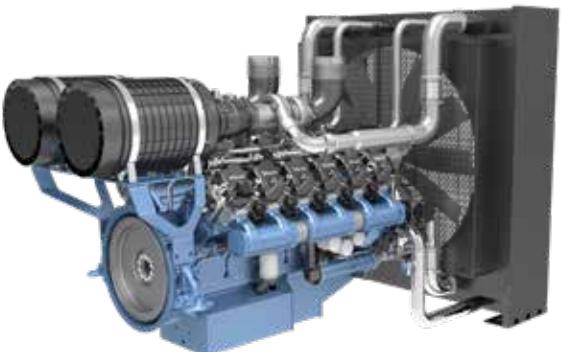

Baudouin is a marine genset specialist, designing and manufacturing marine gensets since the 1930's. These gensets are backed by all major global certifications, giving you peace of mind wherever you operate.

Industrial & Power Generation

PowerKit is Baudouin's innovative line-up of power generation engines, offering a choice of outputs spanning 15 to 3125 kVA for both 50 and 60Hz applications. Crafted with the same components and philosophy as Baudouin's renowned marine engines, they are robust, reliable, and easy to service. In addition to high-end components and engineering excellence, every PowerKit product is backed by the best warranty program on the market: two years and unlimited hours for prime power applications, and four years 800 hours for standby power applications. Today, Baudouin is proud to also offer a vast range of variable speed engines for a variety of industrial applications including irrigation.

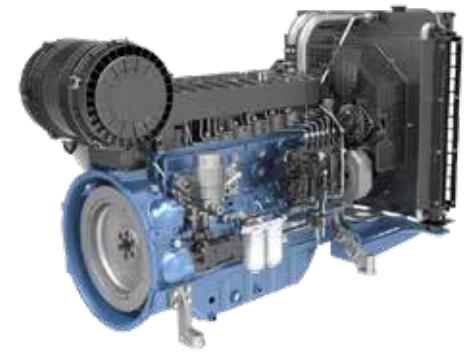

PowerKit Engines

PRP, ESP Power from 18 – 3125 kVA

Baudouin PowerKit engines are designed with the marine philosophy to be durable and reliable in the most harsh operating environments. Baudouin offers one of the most comprehensive generator-drive engine ranges available today, with one of the lowest total costs of ownership in the industry.

Industrial Engines

Power range from 30 - 1108 kWm

Baudouin industrial engines are ideal for pumps and power pack applications that require simple mechanical injection and flexibility for varying degrees of fuel quality. The products are easy to run and easy to maintain, a hallmark of Baudouin engines.

Blue is the New Green

All engines are subject to ever-increasing exhaust gas emissions restrictions. Our new products comply with the latest and most stringent IMO and EPA standards defined for international waters. Our Advanced M26.3 engines meet the IMO III and EPA Tier IV requirements, delivering superior fuel economy without compromising engine power. In order to meet these standards, we developed an optimised Selective Catalyst Reduction System (SCR) which is smaller, lighter and more flexible than most of the solutions available on the market today. The Baudouin SCR solution provides space and cost savings for our customers while maximising performance and reliability.

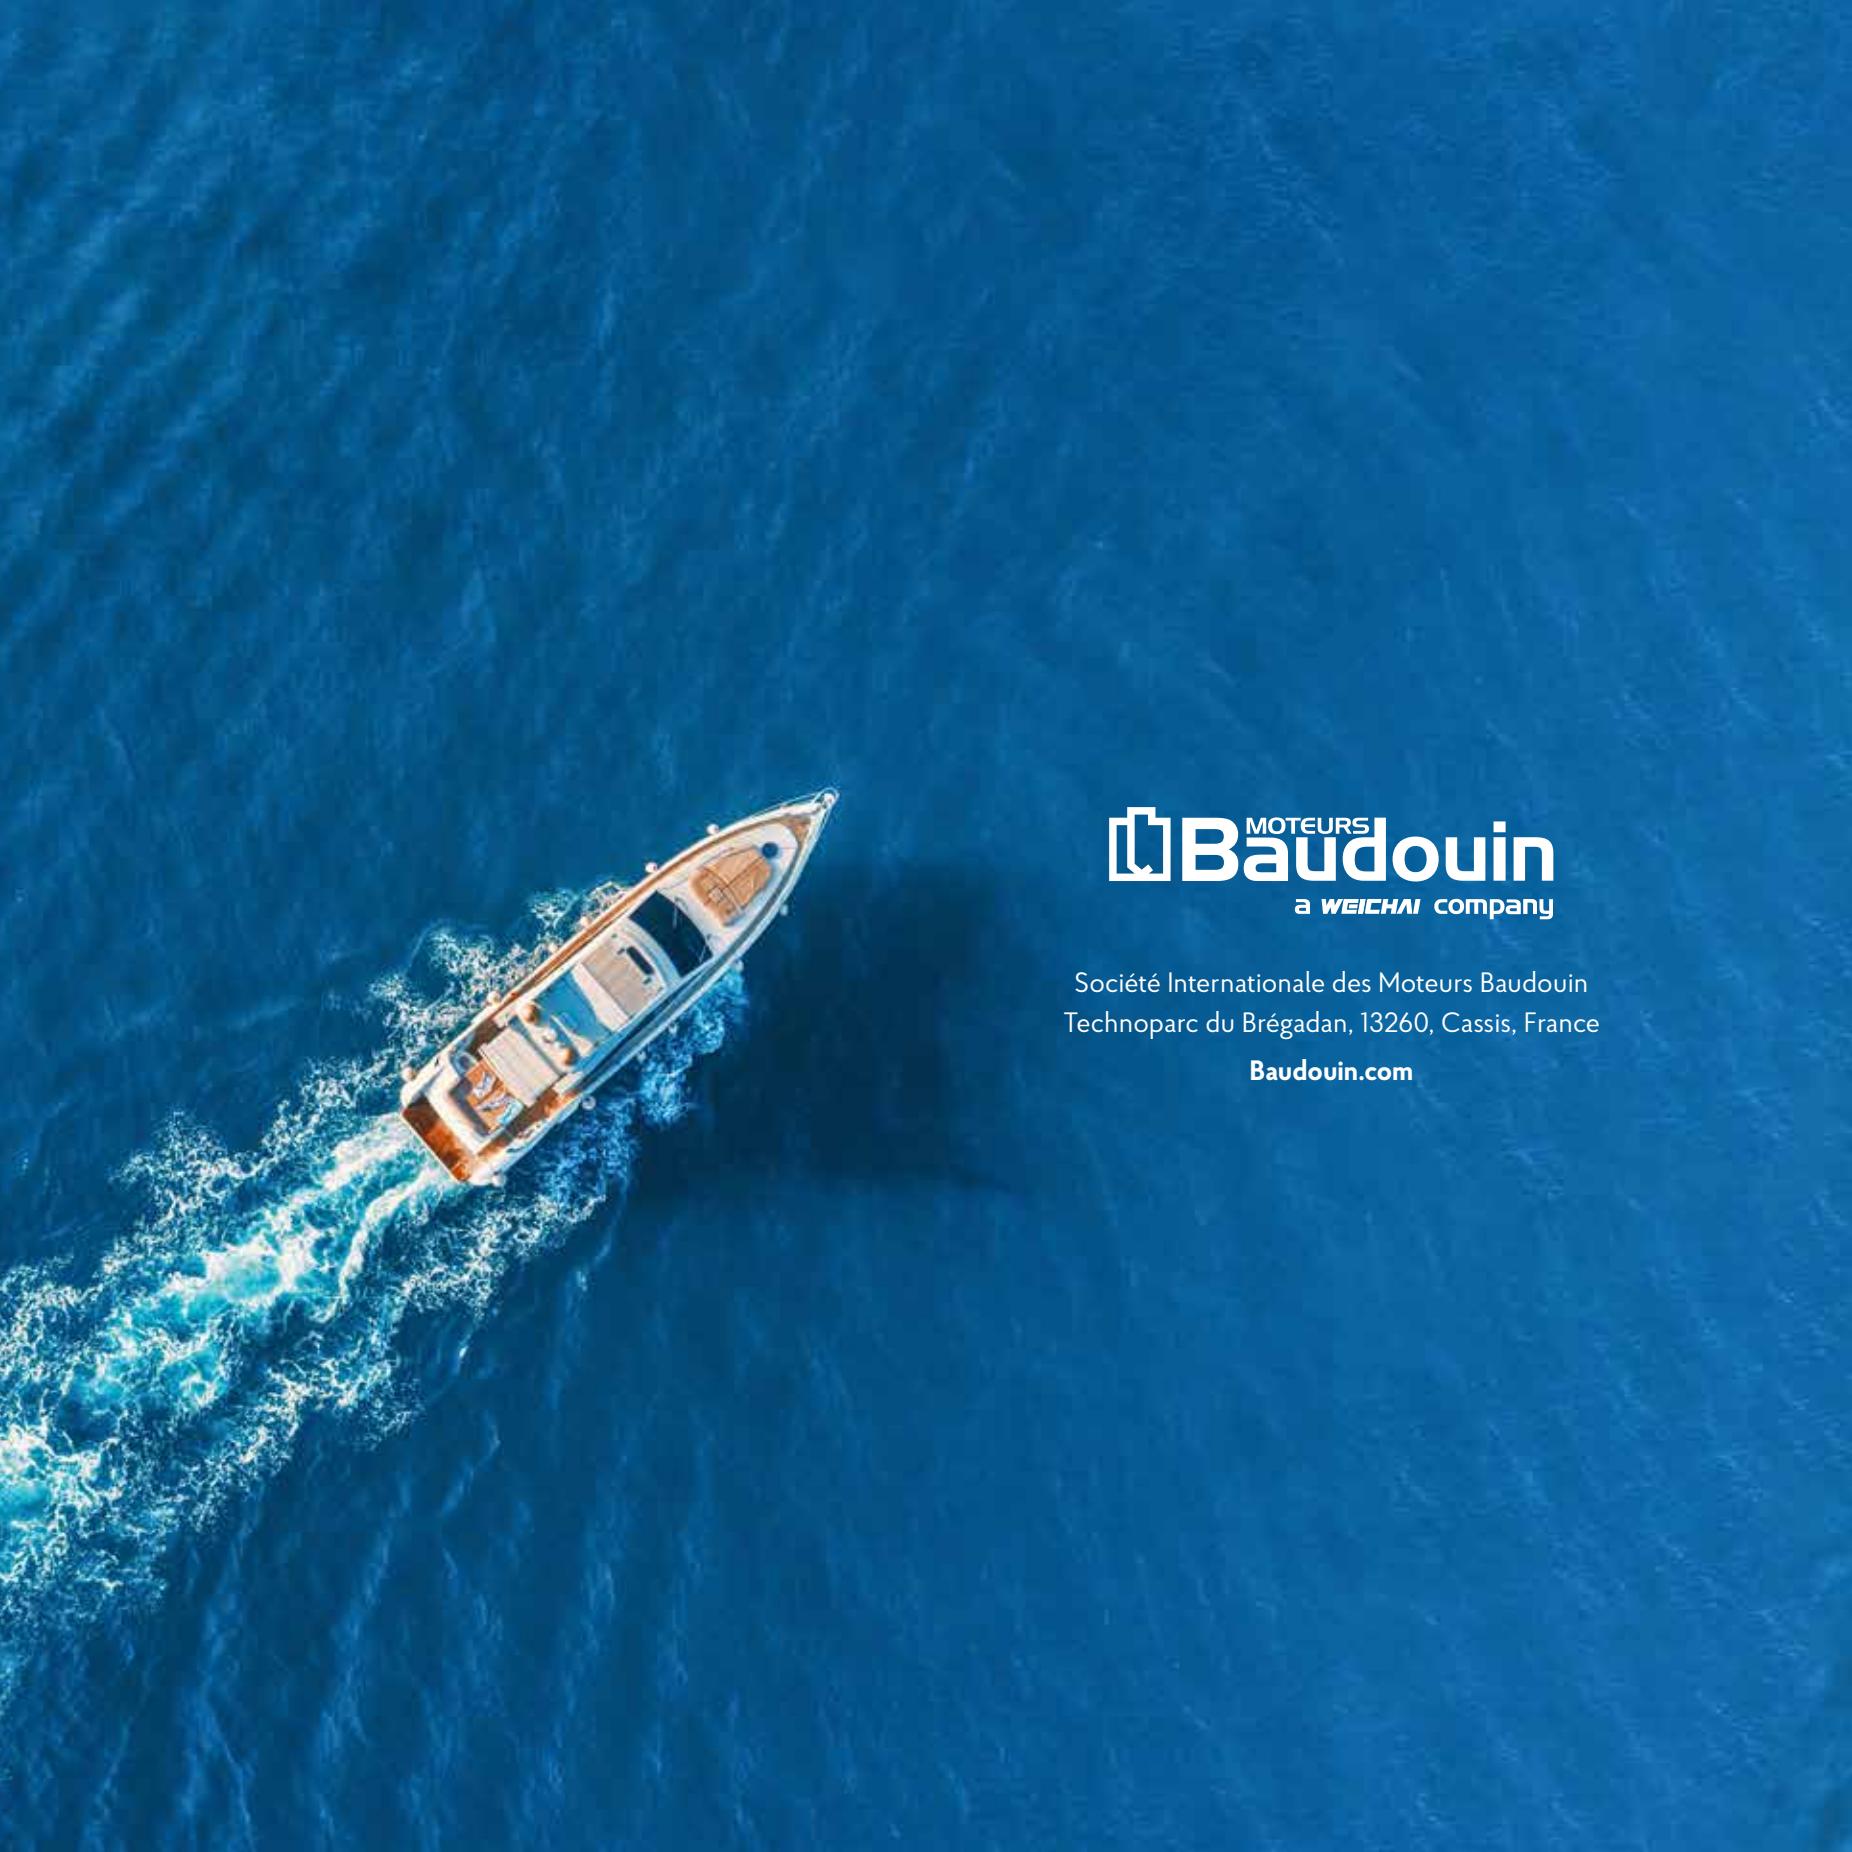

Your Complete System Supplier

Much more than a standard engine manufacturer, Baudouin works in close partnership with every customer to deliver complete systems tailored to their needs. It's a specialty that most other engine manufacturers simply cannot match.

Our expert knowledge and capabilities in certifications, emissions and product tailoring are second to none.

For a complete system that's designed with your needs in mind, it has to be Baudouin.
